# GRUYÈRE AOP

gruyere.com

Made in western Switzerland, Gruyère AOP has been produced in the same way since 1115AD, using raw milk from cows fed on grass in summer and hay in winter. The skilled cheesemakers use 400 litres of fresh milk to make a single 35kg Gruyère AOP wheel. It is the only cheese that has won the title of Best Cheese in the World at the World Cheese Awards four times, which just goes to show how much work and

skill is needed to create its unique and delicious flavour.

Gruyère AOP can be found with different maturities: the Classic is matured for a minimum of five months and has a delicate, nutty, creamy flavour. The Reserve is matured for a minimum of ten months and has a drier, more grainy mouthfeel, with a stronger flavour. The age brings a difference in taste but the recipe always stays the same.

With age, the flavour deepens and becomes more complex without compromising the mellow flavour and creamy texture that's helped make it a national favourite. Launched back in 1995, Yorkshire Blue was Shepherds Purse's first blue cheese, their first cheese made from cow's milk, and the first blue cheese to be made in Yorkshire for 30 years. It's been a consistent international award winner, the latest being Champion English Cheese at last year's Nantwich International Cheese Awards.

# SAUCE SHOP

..... sauceshop.co .....

Sauce Shop began in 2014, in the kitchen of founders Pam and James who were tired of spoiling their food with bland and boring big brand sauces. They founded the business based on the principles of home-cooking and kitchen cupboard ingredients.

The company produces a range of vibrant and flavoursome sauces that span from ketchup to BBQ and chilli sauce, mayonnaise and fermented hot sauces. Having outgrown the couple's home kitchen, the business is now located in its own SALSA accredited production unit within a Victorian lace factory in the heart of Nottingham.

The brand is fast becoming a household name after picking up a total of 12 Great Taste Awards including a 2 star for their Tomato Ketchup, a UK first! The products appeal predominantly to food-loving 25-45 year olds who are seeking exciting sauces to enhance their cooking. Sauce Shop products look great on the shelves and thanks to their colourful appearance and modern branding, they don't sit gathering dust.

# MAKING A GOOD IMPRESSION

What makes a good display and how can it help to attract potential customers? John Bensalhia reports

**F**irst impressions. A key introduction in many walks of life: Job interviews. First dates. That first day at work.

It's also a key consideration for delicatessens, farm shops and food retailers when it comes to the display. Potential customers will make up their minds in seconds when they see a display. An eye-catching, well-organised, innovative display will pique their interest, and attract their custom.

Eve Reid, visual retail specialist of Metamorphosis, explains that in the days of sitcom *Are You Being Served*, visual merchandising was known as 'Display'.

"Due to extensive research into customer behaviour and buying patterns, 'display' has evolved into something more powerful. It now combines the creative art of display, with customer insight and commercial know-how, to attract, engage and motivate the customer to make a purchase."

A visually appealing display is a great way of attracting customers, as Lydia Hodge, Gog Magog shop manager explains: "Attractive displays make a great first impression. A well-arranged display can make a huge difference when it comes to sales. This can be achieved by making them eye catching and interesting. They also need to be full of products and regularly topped up, and correct labelling is a must!"

WBC BRIX  
MODULAR DISPLAY SYSTEM

## Clear messages

Eve Reid says that there are six key factors in display preparation. It must have impact, a clear story/theme; and demonstrate strong composition and use of colour. It should have a strong message, show good use of props, and provide an emotional connection with the chosen product/s.

For extra impact, creativity and imagination are musts. "Create interest and be different," says Ken Corsie, Director at Createpose. "Utilise lighting, themes and props built around the product and its story no matter how simple. Show the products that people would aspire to buy and not what they are going in for. Make it interesting and enticing for the customers to touch and feel, so when people pick up products they are more likely to buy."

## Window gain

When it comes to first impressions, an instant attraction is the window display. The bid to attract custom is literally a matter of seconds. "You have less than two seconds to catch the eye of a potential customer with a window display," says Andy Swinscoe of Courtyard Dairy.

Andy's advice is to keep it simple, and on point. "A customer-friendly display will use big simple, signage which conveys the message effectively. Again, include a quirk. People instantly recognise this, and will see this in those immediate two seconds."

Fascia and window displays are the window to the world of potential customers. "Your brand application and supporting window displays are the three dimensional representation of your brand," explains Ken Corsie. "They talk about who you are, what you offer in terms of a product range and in pricing terms, and are the one opportunity to convert these browsers into customers. Be bold, be consistent but above all be creative with your displays and your POS and never fail to surprise!"

Get it right, and a good, well-prepared and organised display brings many benefits, as Ken Corsie concludes: "A good display can capture your customers' attention, awaken the senses, and provide them with a wonderful buying experience, which will bring them back to the store for the next time and become a loyal customer both now and in the future."
