The glucose revolution is upon us. Influencers and alternative health gurus are endorsing one of our most prescient revelations — the glucose hack. How the body breaks down glucose is apparently a concern for us all, not just diabetics and those with insulin resistance. With a regulated diet, we can all benefit from balanced glucose levels. Put simply, taking acetic acid (ACV) before starchy or carb heavy meals can prevent spikes and crashes we all feel but fail to understand. The mid-afternoon fog that sends you into the spirit world, barely able to return to earth before the day is over. Now Apeal Wörld ACV has hit the market and nailed a great tasting and affordable way to take your daily dose on the go. This drink has all the glucose benefits taken before meals, and helps maintain energy throughout the day.

GRUYÈRE AOP

gruyere.com

Made in western Switzerland, Gruyère AOP has been produced in the same way since 1115AD, using raw milk from cows fed on grass in summer and hay in winter. The skilled cheesemakers use 400 litres of fresh milk to make a single 35kg Gruyère AOP wheel. It is the only cheese that has won the title of Best Cheese in the World at the World Cheese Awards four times, which just goes to show how much work and skill is needed to create its unique and delicious flavour. Gruyère AOP can be found with different maturities: the Classic is matured for a minimum of five months and has a delicate, nutty, creamy flavour. The Reserve is matured for a minimum of ten months and has a drier, more grainy mouthfeel, with a stronger flavour. The age brings a difference in taste but the recipe always stays the same.

THRIVE ON ECOMMERCE WITH ROSETTA BRANDS

The company is expert at elevating fledging and establishing businesses on Amazon's UK and global platforms

Since it launched in 1998, Amazon UK has become one of the leading online shopping destinations for consumers, with Mintel data estimating that more than 90% of British shoppers use the ecommerce site regularly.

Contrary to popular belief, Amazon is not solely reserved for large corporations. It is also an ideal platform for small-to-medium businesses, and the fast-moving consumer goods (FMCG) market. However, for those new to the platform, understanding the route to success can be challenging.

There's often a confusing choice between the various channels available, such as Seller Central FBM, Seller Central FBA, and Vendor Central.

Founded in 2009 by Nick Comer CEO and Steve Keable CFO, Rosetta Brands originally traded in novelty gifts on eBay and Amazon, diversifying as it became more successful into the ecommerce food and beverage industry.

Today, Rosetta Brands is a global Amazon vendor specialist, delivering customised end-to-end solutions, tailored to the needs of brands and distributors. It boasts a clientele of more than 300 brands, and has become one of the largest food and drink suppliers to Amazon UK.

Rosetta Brands recognises emerging food and drink enterprises as the lifeblood of ecommerce, helping them to achieve optimal sales performance through tailored strategies, crafted by dedicated Amazon account managers and advertising and marketing experts.

The company works with everyone from regional producers to public limited companies, and its agency team, RB Digital, is also available for those businesses who want

to keep their Amazon account in-house. Leveraging its 360 services, Rosetta Brands has vast experience elevating sellers within their category.

Having secured investment from Rockpool Investments (a London-based private equity firm), Rosetta now has offices in Germany to service all Amazon European platforms, and is expanding across Europe, chiefly in Italy, Spain, France, The Netherlands, Poland and Sweden. This expansion, a result of booming European demand, allows UK clients to have a slice of the European Amazon market. Additionally, Rosetta has a flourishing business on Amazon Australia, enabling brands of all sizes to succeed on the platform.
